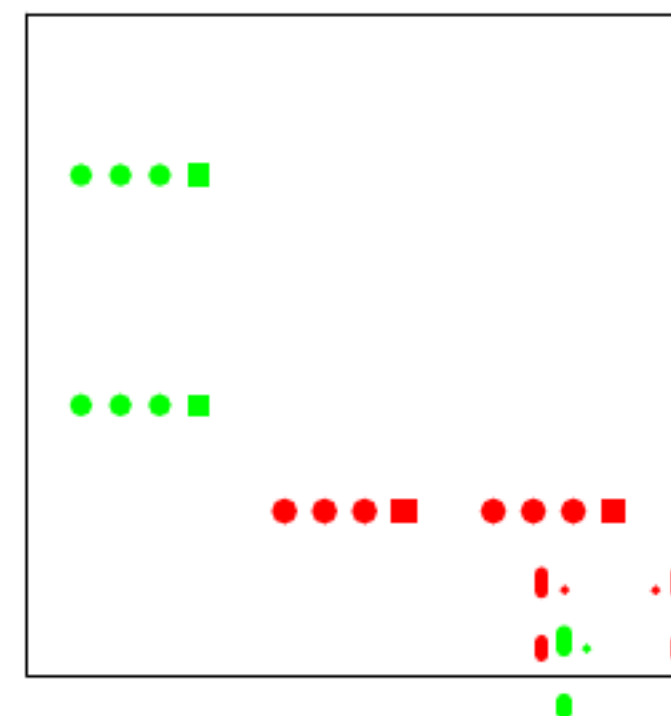

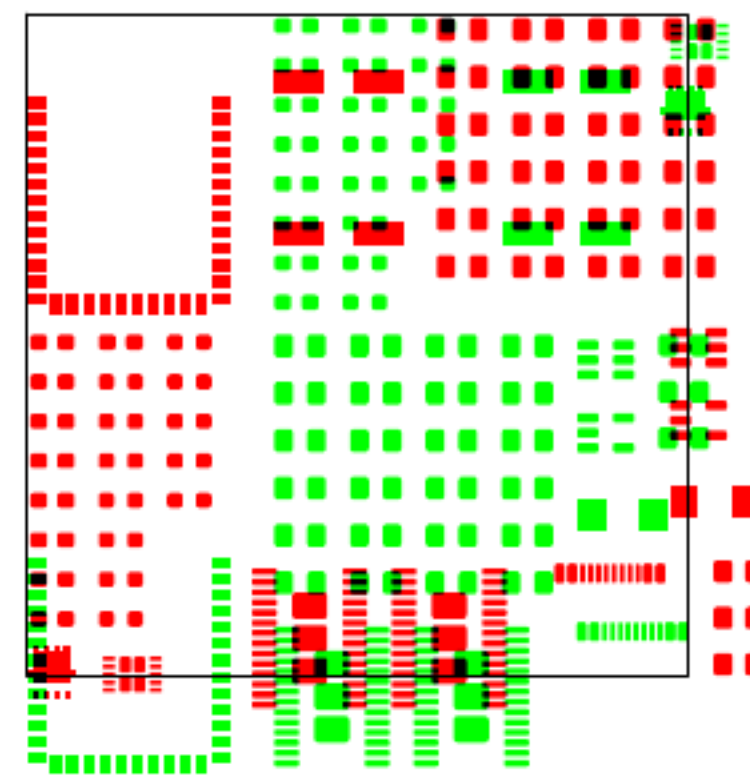

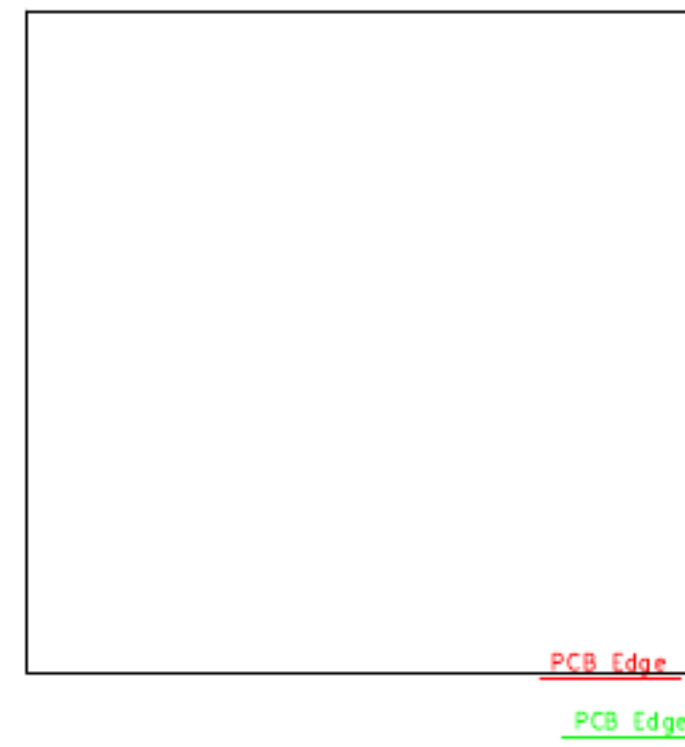

Figure 1 shows a 10x10 grid of nodes labeled with coordinates (C, R). The grid is divided into four quadrants by a vertical line between C=4 and C=5, and a horizontal line between R=4 and R=5. The top-left quadrant (C=0-4, R=0-4) contains a green box labeled J2. The top-right quadrant (C=5-9, R=0-4) contains a red box labeled J1. The bottom-left quadrant (C=0-4, R=5-9) contains a green box labeled J3. The bottom-right quadrant (C=5-9, R=5-9) contains a red box labeled J4. The nodes are labeled with their coordinates: C0-C9 and R0-R9. The grid is used to illustrate the construction of a 2D lattice and the definition of a 2D lattice function.
